# Safety Seminar for Underground Stone Mines

The 10th Annual Underground Stone Safety Seminar once again provides a forum to address issues relevant to mine workers and industry officials in this sector of mining. This year's seminar will feature a workshop on Diesel Emissions Control Technologies and Strategies. We are also fortunate to have a number of Stone Industry representatives to present first hand mining experiences as they relate to their underground operations. You won't want to miss the Earlybird Workshop on Fire Safety in Metal and Nonmetal Mines (December 6, starting at 4:00 pm). Hope to see you in Louisville.

PLEASE NOTE: If you have already registered by using the Early Registration Notice you do not need to register again. However, if your plans have changed and you are unable to attend, please let us know.
